

Saint Kateri Parking Lot

The project involves the parking lots and driveways at Saint Kateri Tekakwitha Catholic Church located at 22508 Copper Hill Dr in Santa Clarita, CA 91350. The primary scope includes a 2" grind and replace of our A and C Parking lots and West driveway, replacing the paving in our B parking lot and East driveway with high density asphalt, converting existing stalls into 22 new ADA stalls. Due to this, the project involves adding retaining walls, updating curbing for ADA compliance, moving or replacing existing light posts, and moving the utility meters. Since the church intends to continue holding mass services in the main hall during construction, the project requires a well-coordinated plan for temporary entrances and a management schedule that respects service times. Therefore, this project will be phased per parking lot A, B, and C.

Timing is critical: the parish needs to start on July 20th 2026, as there is an open window of opportunity with the least amount of traffic, and complications. Construction End date will be August 31,2026. These plans are awaiting final city approval. First comments have been received and accounted for. Please note that the ramp shown on page 3 of the document 01_3409_Archdio_Pkg-SET_030526 (Construction note 6) has been omitted and is no longer part of the project.

The bid due date will be on June 30,2026.
