In the event name field, enter the project number and click search. While viewing the Event Details, click on "View Event Package" to view RFBI responses.

Project No.: 3540SRAEUCO0182
Project Name: Parkfield Fire Station Facility Replacement
Location: 70331 Vineyard Canyon Road, Parkfield, California

Drawing Reference: N/A Project Manual Reference: SWPP

Question:

G003 requires an approved water supply for fire protection to be available from the start of construction until the permanent system is accepted. The site has no municipal water supply. Please clarify what temporary fire protection water arrangement will be acceptable (e.g., on-site storage quantity), and confirm whether the new 64,000-gallon fire-suppression tank may be placed in temporary service for this purpose once installed and filled.

Temporary fire-protection water supply during construction must comply with the California Fire Code and be approved by the State Fire Marshal as the Authority Having Jurisdiction. It is the Contractor's responsibility to develop and implement temporary fire-protection measures subject to the approval of the State Fire Marshal. CAL FIRE has no objection to the Contractor proposing temporary use of the new 64,000-gallon fire-suppression tank once installed. However, any such use is subject to approval by the State Fire Marshal.

Response by G. Vincent
